

Customer Support Policy

Overview

This policy describes the support services we provide, our response time commitments, and the channels through which customers can reach our team.

Support Channels

Email support is available at support@company.com, monitored Monday through Friday from 9 AM to 6 PM. Live chat is available on our website during the same hours.

For complex issues requiring investigation, email is preferred as it allows our team to review your full account history before responding.

Response Time Commitments

We aim to respond to all email inquiries within 24 hours on business days. Live chat queries are typically answered within 5 minutes during business hours.

Complex cases involving third-party couriers or payment processors may require up to 5 business days to resolve.

What to Include in a Support Request

Include your order number, the email on your account, a clear description of the issue, and any relevant screenshots.

Providing complete information upfront ensures the fastest possible resolution and avoids back-and-forth follow-up questions.

Escalations

If unsatisfied with the resolution, request escalation by replying to your thread with **ESCALATE** in the subject line.

Escalated cases are reviewed within 2 business days by a senior team member who will contact you directly.

Feedback

After your case is closed you will receive a short satisfaction survey by email. For general suggestions email feedback@company.com.
